CAREER OBJECTIVE

To begin my career as a frontend and backend developer in a dynamic organization where I can apply my programming knowledge to create efficient, user-friendly applications, and continuously enhance my skills to grow as a full-stack developer

PROJECTS HIGHLIGHT

Rock, Paper, Scissors Game
HTML | CSS | JavaScript

- Created an interactive Rock , Paper, Scissors game using HTML, CSS, and JavaScript, featuring dynamic UI updates via DOM manipulation, real-time score tracking , and randomized computer moves.

YouTube Video Automation

- Built an interactive UiPath automation using Input Dialog for user input on YouTube searches and actions.
- Used Click and Delay activities to ensure smooth, reliable interaction with video elements across varying network speeds.
